

## SAFETY DATA SHEET Break-In Engine Oil SAE 30

According to Appendix D, OSHA Hazard Communication Standard 29 CFR §1910.1200 and WHMIS 2015, in compliance with the Hazardous Product Act (HPA, as amended) and the requirements of the Hazardous Product Regulations (HPR).

| 1. Identification   |   |  |
|---|---|--|
| Product identifier  |   |  |
| Product name  | Break-In Engine Oil SAE 30  |  |
| Product number  | BRK   |  |
| Recommended use of the chemical and restrictions on use                 |   |  |
| Application   | Lubricating oil.  |  |
| Uses advised against  | Avoid the formation of mists.   |  |
| Details of the supplier of the s  | afety data sheet  |  |
| Supplier  | AMSOIL INC.<br>Bordner, Ladner, Gervais<br>Scotia Plaza, 40 King St W<br>Toronto, ON, Canada M5H 3Y4<br>T: +1 416-367-6547                            |  |
| Manufacturer  | AMSOIL INC.<br>One AMSOIL Center,<br>Superior, WI 54880, USA.<br>T: +1 715-392-7101<br>compliance@amsoil.com  |  |
| Emergency telephone number  | r   |  |
| Emergency telephone   | CHEMTREC: Within USA and Canada: 1-800-424-9300<br>Outside the USA and Canada: +1 703-741-5970<br>(collect calls accepted) 24/7                       |  |
| 2. Hazard(s) identification   |   |  |
| Classification of the substance   | e or mixture  |  |
| OSHA/WHMIS Regulatory<br>Status   | This Product is not Hazardous under the OSHA Hazard Communication Standard and according to the hazard criteria of the Hazardous Product Regulations. |  |
| Physical hazards  | Not Classified  |  |
| Health hazards  | Not Classified  |  |
| Environmental hazards   | Not Classified  |  |
| Label elements<br>Hazard statements                                     | NC Not Classified   |  |
| Other hazards   |   |  |
| This product does not contain any substances classified as PBT or vPvB. |   |  |
| 3. Composition/information on ingredients                               |   |  |

#### Mixtures

# Break-In Engine Oil SAE 30

| Hydrogenated base oil         |  | 2.5 - <5%                              |
|-------------------------------|--|--|
| CAS number: 64742-54-7        |  |  |
| Classification                |  |  |
| Asp. Tox. 1 - H304            |  |  |
| Phosphorodithioic acid, O,    | ,O-di-C1-14-alkyl esters, zinc salts   | 1 - <2.5%                              |
| CAS number: 68649-42-3        |  |  |
| Classification                |  |  |
| Skin Irrit. 2 - H315          |  |  |
| Eye Irrit. 2A - H319          |  |  |
|                               | tatements is displayed in Section 16.  | 0.4000                                 |
| Composition comments          | The exact percentage is withheld as a trade secret in accordance with 29 CFR 191   | 0.1200.                                |
| 4. First-aid measures         |  |  |
| Description of first aid meas |  |  |
| General information           | Get medical attention if any discomfort continues. Show this Safety Data Sheet to t personnel.   | he medical                             |
| Inhalation                    | Move affected person to fresh air and keep warm and at rest in a position comforta breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.  |  |
| Ingestion                     | Rinse mouth thoroughly with water. Remove any dentures. Give a few small glasse<br>or milk to drink. Stop if the affected person feels sick as vomiting may be dangerou<br>induce vomiting unless under the direction of medical personnel. If vomiting occurs<br>should be kept low so that vomit does not enter the lungs. Never give anything by r<br>unconscious person. Maintain an open airway. Loosen tight clothing such as collar | s. Do not<br>, the head<br>mouth to ar |
| Skin Contact                  | Remove affected person from source of contamination. Rinse immediately with ple water.   | nty of                                 |
| Eye contact                   | Rinse immediately with plenty of water. Remove any contact lenses and open eyeli apart. Continue to rinse for at least 10 minutes.   | ids wide                               |
| Protection of first aiders    | First aid personnel should wear appropriate protective equipment during any rescu  | e.                                     |
| Most important symptoms a     | and effects, both acute and delayed  |  |
| General information           | See Section 11 for additional information on health hazards. The severity of the syn<br>described will vary dependent on the concentration and the length of exposure.   | mptoms                                 |
| Inhalation                    | Prolonged inhalation of high concentrations may damage respiratory system.   |  |
| Ingestion                     | Gastrointestinal symptoms, including upset stomach. Fumes from the stomach con be inhaled, resulting in the same symptoms as inhalation.   | itents may                             |
| Skin contact                  | Prolonged contact may cause dryness of the skin.   |  |
| Eye contact                   | May cause temporary eye irritation.  |  |
| Indication of immediate me    | dical attention and special treatment needed   |  |
| Notes for the doctor          | Treat symptomatically.   |  |
| Specific treatments           | No special treatment required.   |  |
| 5. Fire-fighting measures     |  |  |

SAVE UP TO 25%

# Break-In Engine Oil SAE 30

| Extinguishing media                           |  |
|---|--|
| Suitable extinguishing media                  | The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.   |
| Unsuitable extinguishing media                | Do not use water jet as an extinguisher, as this will spread the fire.   |
| Special hazards arising from the              | ne substance or mixture  |
| Specific hazards                              | Containers can burst violently or explode when heated, due to excessive pressure build-up.<br>Contains Hydrocarbons. The product is immiscible with water and will spread on the water<br>surface.   |
| Hazardous combustion<br>products              | Thermal decomposition or combustion products may include the following substances:<br>Harmful gases or vapors.   |
| Advice for firefighters                       |  |
| Protective actions during firefighting        | Avoid breathing fire gases or vapors. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapors and protect men stopping the leak.  |
| Special protective equipment for firefighters | Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Standard Firefighter's clothing including helmets, protective boots and gloves, that provides a basic level of protection during chemical incidents is defined by the Canada Occupational Health and Safety Regulations, by provincial guidelines on occupational health and safety or by NFPA standards if applicable.                                |
| 6. Accidental release measure                 | s  |
| Personal precautions, protectiv               | ve equipment and emergency procedures  |
| Personal precautions                          | No action shall be taken without appropriate training or involving any personal risk. Keep<br>unnecessary and unprotected personnel away from the spillage. Wear protective clothing as<br>described in Section 8 of this safety data sheet. Follow precautions for safe handling<br>described in this safety data sheet. Wash thoroughly after dealing with a spillage. Use<br>protective equipment appropriate for surrounding materials.                  |
| Environmental precautions                     |  |
| Environmental precautions                     | Avoid discharge to the aquatic environment.  |
| Methods and material for conta                | ainment and cleaning up  |
| Methods for cleaning up                       | Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Reuse or recycle products wherever possible. Absorb the spillage with an inert, dry material and place it in a suitable waste disposal container. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. Dispose of contents/container in accordance with national regulations. |
| Reference to other sections                   | For personal protection, see Section 8. For waste disposal, see Section 13.  |
| 7. Handling and storage                       |  |
| Precautions for safe handling                 |  |
| Usage precautions                             | Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containers carefully to minimize spills. Keep container tightly sealed when not in use. Avoid the formation of mists. Avoid contact with used product. Do not reuse  |

empty containers.

## Break-In Engine Oil SAE 30

| Advice on general<br>occupational hygiene | Wash promptly if skin becomes contaminated. Take off contaminated clothing and wash before reuse. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace. |  |
|---|---|--|
| Conditions for safe storage, in           | cluding any incompatibilities   |  |
| Storage precautions                       | Store away from incompatible materials (see Section 10). Keep container tightly closed, in a cool, well ventilated place. Protect containers from damage.   |  |
| Storage class                             | Chemical storage.   |  |
| Specific end uses(s)                      |   |  |
| Specific end use(s)                       | The identified uses for this product are detailed in Section 1.   |  |
| 8. Exposure Controls/personal protection  |   |  |
| Control parameters                        |   |  |
| Occupational exposure limits              |   |  |
| Comments                                  | The following constituents are the only constituents of the product which have a PEL, TLV or  |  |

other recommended exposure limit. At this time, the other constituents have no known exposure limits.

Under conditions which may generate mists, the following exposure limits are recommended: Long-term exposure limit (8-hour TWA): 5 mg/m<sup>3</sup> Short-term exposure limit (15-minute): 10 mg/m<sup>3</sup>

#### **Xylene**

Long-term exposure limit (8-hour TWA): OSHA 100 ppm 435 mg/m<sup>3</sup> Long-term exposure limit (8-hour TWA): ACGIH 100 ppm 434 mg/m<sup>3</sup> Short-term exposure limit (15-minute): ACGIH 150 ppm 651 mg/m<sup>3</sup> A4

#### Ethylbenzene

Long-term exposure limit (8-hour TWA): OSHA 100 ppm 435 mg/m<sup>3</sup> Long-term exposure limit (8-hour TWA): ACGIH 20 ppm 87 mg/m<sup>3</sup>

A3

OSHA = Occupational Safety and Health Administration. ACGIH = American Conference of Governmental Industrial Hygienists. A3 = Confirmed Animal Carcinogen with Unknown Relevance to Humans. A4 = Not Classifiable as a Human Carcinogen.

#### Ethylbenzene (CAS: 100-41-4)

Immediate danger to life 800 ppm and health

Exposure controls

Appropriate engineering<br/>controlsProvide adequate ventilation. Good general ventilation should be adequate to control worker<br/>exposure to airborne contaminants.

Eye/face protectionEyewear complying with an approved standard should be worn if a risk assessment indicates<br/>eye contact is possible. Personal protective equipment for eye and face protection should<br/>comply with OSHA 1910.133 and/or the Canadian regulation on health and safety at work,<br/>SOR/86-304, Part XII (12.6), and any relevant provincial regulation relating to health and<br/>safety at work. The following protection should be worn: Chemical splash goggles.

SAVE UP TO 25%

# Break-In Engine Oil SAE 30

| Hand protection                 | Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with OSHA 1910.138 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.9), and be demonstrated to be impervious to the chemical and resist degradation. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended. |
|---------------------------------|--|
| Other skin and body protection  | Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.  |
| Hygiene measures                | Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke.   |
| Respiratory protection          | Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Provide adequate ventilation. Large Spillages: If ventilation is inadequate, suitable respiratory protection must be worn.  |
| Environmental exposure controls | Not regarded as dangerous for the environment.   |

9. Physical and Chemical Properties

### Information on basic physical and chemical properties

| Appearance                                   | Liquid.                               |
|--|---------------------------------------|
| Color  | Red.                                  |
| Odor   | Mild hydrocarbon.                     |
| Odor threshold                               | Not available.                        |

## Break-In Engine Oil SAE 30

| General information   | The generation of waste should be minimized or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements. |  |
|---|---|--|
| Disposal methods  | Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste packaging should be collected for reuse or recycling. Incineration or landfill should only be considered when recycling is not feasible. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of the local water authority.                          |  |
| 14. Transport information   |   |  |
